Securing and Empowering Enterprises
with Consulting Services and Innovative Solutions

Services

Solutions

Our Mission

At Attosol, our mission is to *secure and empower enterprises with consulting services and innovative solutions.* We are driven by a passion for creating advanced technological solutions that address the unique challenges of our clients. By focusing on both security and innovation, we ensure that our clients can operate with confidence and efficiency.

Our Vision

We envision *shaping the future by combining advanced security with a wide range of innovative solutions, empowering people and businesses.* Our goal is to lead the way in integrating cutting-edge technologies and security measures to provide solutions that not only meet current needs but also anticipate future demands. We aim to enable individuals and organizations to thrive in an ever-evolving digital landscape.

About Us

Attosol is dedicated to transforming the way businesses and individuals interact with technology. With a commitment to innovation and security, we specialize in delivering best-in-class consulting and cutting-edge solutions tailored to meet diverse needs. Our expertise spans across various domains, ensuring that we provide comprehensive support and solutions to our clients.

What We Do...

Security Integration

We utilize advanced security solutions from leading providers like Microsoft and other industry leaders. Our approach ensures that security is seamlessly integrated into all our offerings, protecting our clients from evolving threats.

Expert Services

As a trusted partner, we offer specialized services in Identity and Access Management, Endpoint Management, Infrastructure and Data Protection, and Security Operations Center. Our services are designed to help enterprises navigate complex technological landscapes with ease and security.
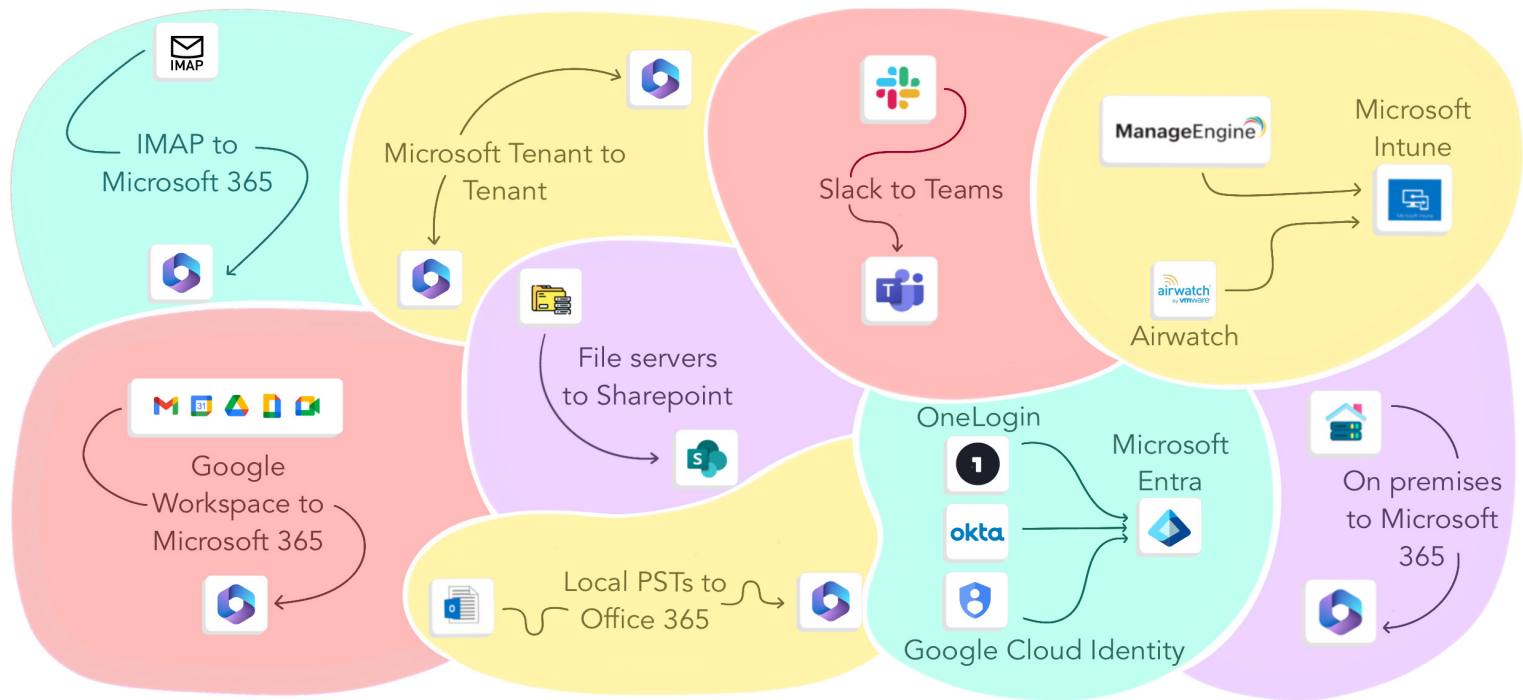

Innovative Solutions

We develop and implement solutions across various domains, including web hosting, data migration, and API development. Our flagship product, BakeMyWeb, exemplifies our dedication to delivering user friendly and effective web hosting solutions.

Platform Migrations

One of the daunting tasks faced by IT during mergers and demergers is migration. It is akin to servicing an airplane while it's flying. With years of migration experience under our belt, we help our customers securely and conveniently migrate identities, devices, data, and applications.

Google Cloud Identity → Microsoft Entra
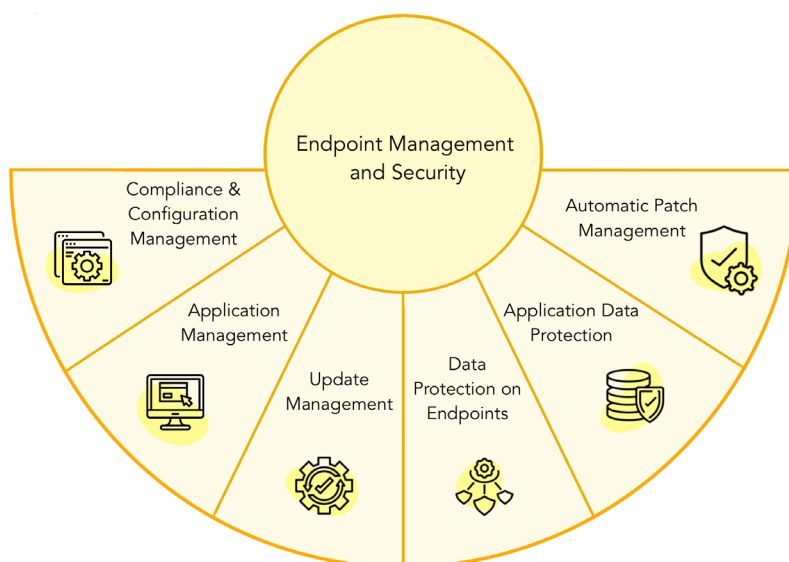

On premises to Microsoft 365

Identity & Access Management (IAM)

IAM is one of the most critical component for an organization, ensuring that only authorized users have access to specific services and resources. It involves defining and managing roles and access privileges for individuals, thereby enhancing security and compliance. With over 3 decades of experience in IAM, we offer consulting and implementation of:

Identity Zero Trust model

Identity Lifecycle Management

Going Passwordless

Identity & Access Management
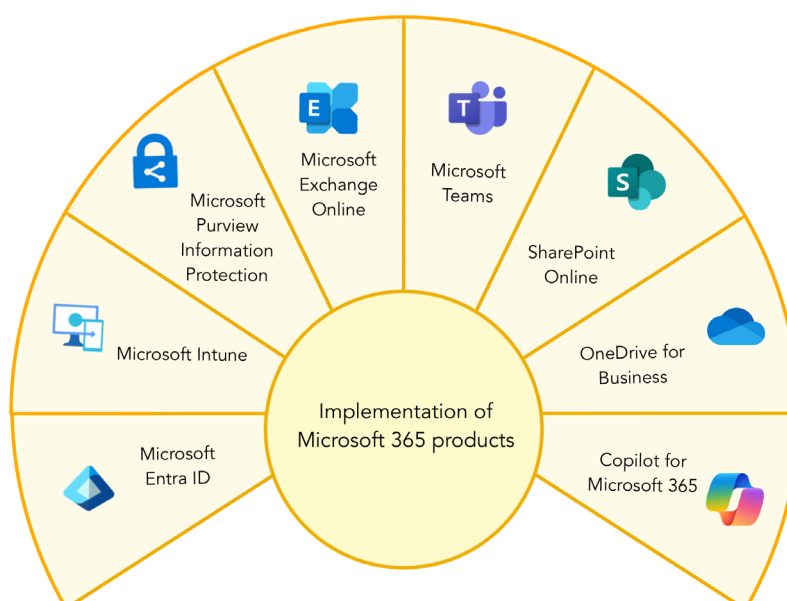

Identity Protection & Governance

Endpoint Management & Security

Endpoint Management and Security is crucial for safeguarding an organization's IT infrastructure by monitoring, managing, and securing all devices connected to the network. This includes ensuring compliance with security policies, timely updates, and protection against threats like malware and unauthorized access. A robust endpoint management and security solution can offer:

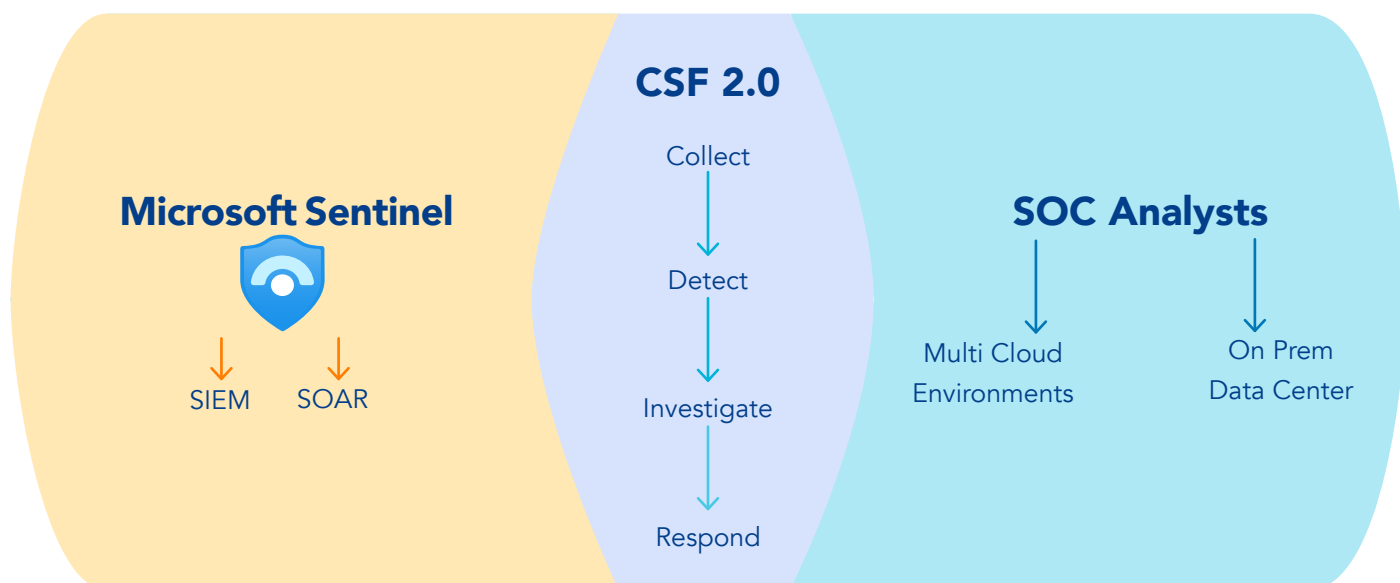

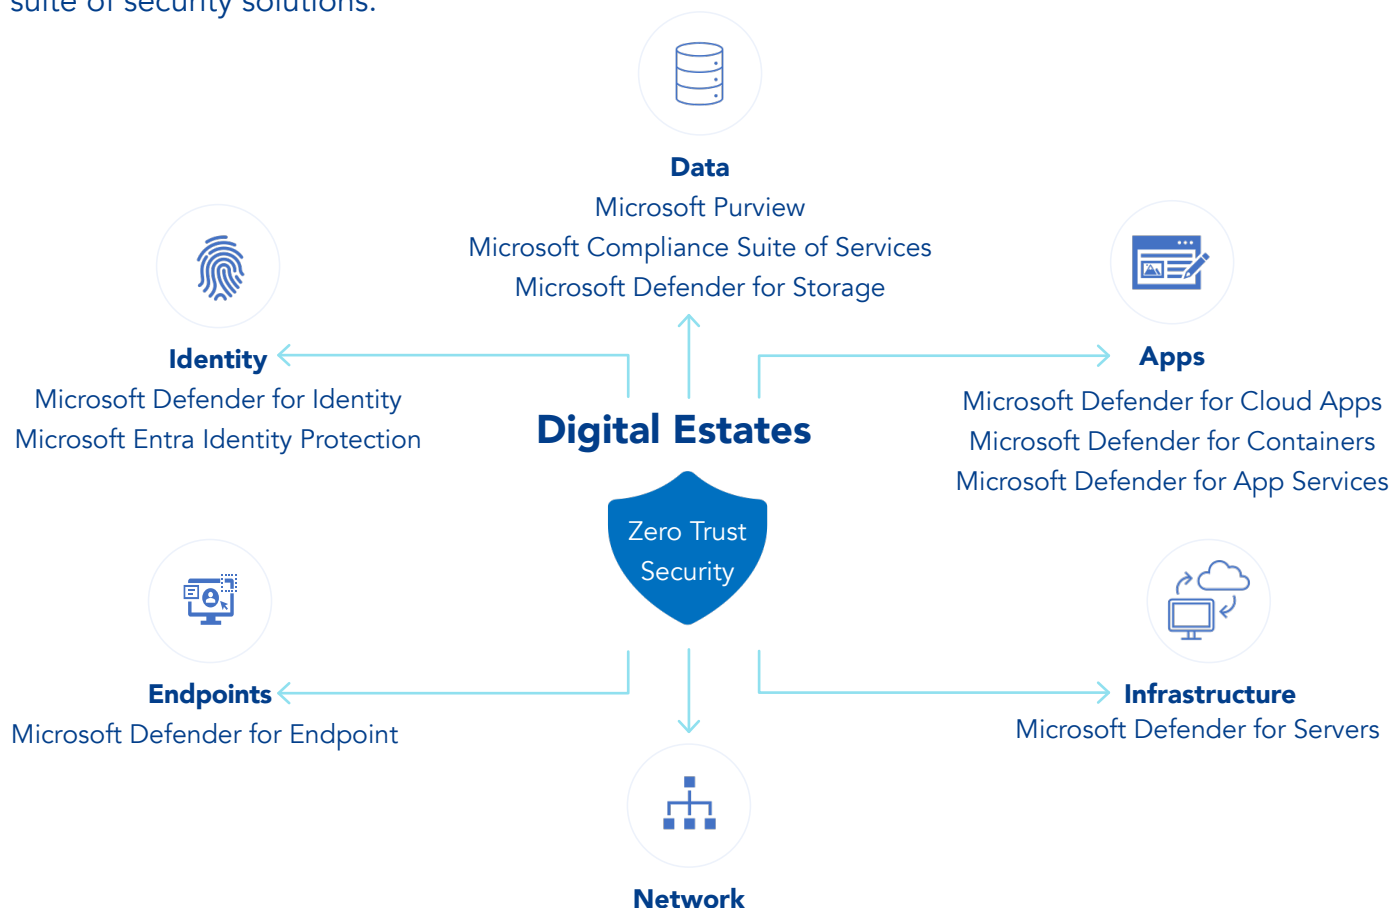

Implementation of Microsoft 365 products

Microsoft 365 has a vast number of products to help enterprises achieve their goals in managing and securing identity, device, data, and applications. As a Microsoft solution partner in Modern Work & Security, we have vast experience with Microsoft 365 products and can help implement or better the following products:

Cybersecurity Solutioning

In the ever-evolving threat landscape, it is important to protect your digital estates with the power of solutions that offer capabilities like unified threat Intelligence and XDR. As a Microsoft Partner we help customers in defining their cybersecurity maturity model by implementing Microsoft Defender suite of security solutions.

Developer Services

We specialize in delivering top-notch developer services that cater to your business needs. With a strong focus on modern technologies and cloud platforms, we bring expertise and experience to help you achieve your goals efficiently and effectively.

Microsoft Power Platform Development & Consulting Services

Transform your business with Microsoft Power Platform. With Power BI, Power Apps, Power Automate, Power Pages, and Power Virtual Agents, you can create custom apps, automate workflows, analyze data, and build intelligent chatbots—all with minimal coding. Our expert team will help you leverage this low-code platform to enhance productivity and drive innovation.
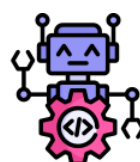

API Development & Integration Services

Enhance your systems with our top-tier API development services. Whether it's RESTful, SOAP, or GraphQL, we ensure high performance and reliability, driving innovation and efficiency for your business. We can help you integrate any line-of-business application.

Business Process Automation

Streamline your operations with our Business Process Automation services. We use cutting-edge tools to automate workflows, enhance efficiency, and reduce costs, driving innovation and productivity for your business.

JavaScript Full Stack Development

Unlock the full potential of your web applications with our expert JavaScript development services. Our team leverages cutting-edge frameworks and tools like React, Node.js, and TypeScript to create dynamic, responsive, and user-friendly web experiences. Whether you need a robust single-page application, a scalable server-side solution, or seamless integration with cloud services, we have the expertise to deliver. Choose us to elevate your web presence and drive your business forward with innovative JavaScript solutions.

Kubernetes & Docker Consultation

Unlock the full potential of your infrastructure with Kubernetes and Docker. Docker ensures consistent containerization, while Kubernetes automates deployment, scaling, and management. Together, they offer unmatched efficiency, flexibility, and scalability. Let our expert team streamline your operations and accelerate your development cycle with these cutting-edge technologies.

Our Customers

We take pride in serving a diverse range of customers. Here are some of our esteemed clients:
